# KM878240G02 Kone Lift Testing Tool

Kod produktu: KM878240G02

KM878240G02 Kone Elevator Service Tool Unlimited. The device is able to unlock any type of KONE liftand escalator, as long as it can be connected to the motherboard of that device. Unlike the previous version, it has no limits (the previous version unlocked the lift or escalator for 200 rides).
Device Description:

- Connect input A (Pin D9) to LOPCB boards: PCECPU40, LCECPU591 or MAP.
- The power button is also used to open the device.
- LED light is used for diagnosis.
- Input B (Pin D9) is used for troubleshooting connection problems.
- The device is powered by a 9 V battery.
- Two cables included, one for LCECPU20 and the other for LCECPU40 or LOPCB.
